Practical Experience-Dependable Service-Reliable Outcomes

NJDEP

Site Remediation Reform Act (SRRA)

On May 7, 2009, Governor Jon Corzine signed the Site Remediation Reform Act, N.J.S.A. 58:10C-1 et seq.

- Established a Licensed Site Remediation Professional (LSRP) who will now issue the Response Action Outcome (RAO)-**NO MORE NJDEP NFA LETTERS**
- Timely remediation becomes a **requirement** not a “suggestion”
- The NJDEP will have limited oversight on projects, but primarily they will track compliance, conduct enforcement and audit projects and LSRPs
- NJDEP will no longer be the process gate keeper for projects, that falls on the LSRP-**DON'T WAIT FOR THE NJDEP**

Parties who initiated remediation prior to November 3, 2009 will not be required to hire a LSRP to conduct the remediation right away, however it may delay project timeframes. Parties who begin remediation after November 9, 2009 will need to comply with the SRRA.

The EC Group has licensed New Jersey Site Remediation Professionals to assist with your projects.

Please feel free to contact ECG if you should have questions about how the SRRA may affect your remedial projects or if you are in need of a Licensed Site Remediation Professional for new projects. We can and will continue to meet your professional environmental consulting needs.
